**Associate Technical Lead | OrangeHRM**

## PROFILE

I am an energetic and enthusiastic individual who enjoys a challenge and achieving personal and team goals. My present career aim is to work within IT since I enjoy coding and designing software. I like the environment and find the work quite interesting and satisfying. The opportunity to learn new skills and work with new technologies is particularly attractive to me. I was the Batch Topper at my college for two consecutive years and received a scholarship for my achievements. I passed out with a Bsc in Computer Science with First Class Honors. Apart from my technical expertise in the IT industry, I'm quite fluent in English and have excellent communication skills.

I have approximately 5 years of hands-on experience in the IT industry where I started off as a Software Engineering Intern at OrangeHRM (www.orangehrm.com)  and worked my way up the company to become an Associate Tech Lead. I currently play the role of Technical Lead in our Open Source product (github.com/orangehrm/orangehrm) and the Value Added Services Team, as well as the role of a Senior Software Engineer in the Customizations Department. Since OrangeHRM is a product based company, I have plenty of experience in implementing highly maintainable and clean code with the use of Design Patterns and Test Driven Development. I've mainly worked with PHP frameworks but language is no barrier. I  have conducted workshops and interviews at universities representing OrangeHRM and have also worked with clients based throughout the globe, including Europe and USA.

## TARGET JOB

I reside in Sri Lanka, but I'm currently looking for employment abroad for the position of **Software Engineer**.
Will be available for employment within 2 months after receiving the job offer.

## SKILLS

- ➤ **5+ Years of Experience**
  - ○ PHP | Symfony | Doctrine
  - ○ Javascript | JQuery
  - ○ Mysql | MariaDB
  - ○ Ubuntu | CentOS
  - ○ Apache
  - ○ Test Driven Development | Unit Tests | PHPUnit | Codeception
